BOY®
Spritzgiessautomaten

NEW
BOY LR 5 *Compact*

Fully integrated – no safety fence required!

3,1 m²
Installation area
instead of 5,2 m² with an external protective fence

100%
integrated
Handling + Conveyor Belt under the protective cover

2,6 m
Ceiling height

EASIER TO USE

- Fully integrated into the Procan ALPHA® 6 control system
- Just one data record for the machine and handling
- Centralised error management
- Machine and handling as a single unit transportable (pallet truck/forklift)

REDUCE COSTS

- No external safety fence
- No additional handling control
- EM67 and EM78 are not required
- The production cell is supplied as a single unit – minimal installation effort
- Access to the tool installation area from both sides
- Only training on how to use the control system is required
